**APPLICATION**

**for the Decision on Environmental Conditions**

**and**

**definition of the scope for the Environmental Impact Assessment Report**

Acting on behalf of PGE EJ1 Sp. z o.o. based in Warsaw and on the basis of art. 71 par. 2 and art. 73 par. 1 of the Act of 3 Oct. 2008 on Providing Information on the Environment and Environmental Protection, Public Participation in Environmental Protection and Environmental Impact Assessment (i.e. J o L of 2013, item 1235, as amended, hereinafter the Environmental Protection Law) **we hereby apply for the decision on environmental conditions to be issued for the planned project consisting of the construction and operation of a nuclear power plant up to 3750 MWe of capacity (the "Project"), within the boundaries of the site as defined and specified in Section 6 and 7 of the ESR, on the territory of the following communes: Choczewo, or Gniewino and Krokowa in the Pomeranian voivodeship**

We also apply for the definition of the scope for the Environmental Impact Assessment Report for the above Project, in compliance with art. 69 par. 1 and 2 of the Environmental Protection Law. On the basis of art. 68 par. 2 pt. 2 we request that the decision defining the scope of the report also determine:

- a) types of alternative options that require investigation,

PGE EJ 1 Sp. z o.o. with its registered seat in Warsaw, 00-542 Warsaw, ul. Mokotowska 49, entered into the National Court Register (KRS) of the District Court for the capital city of Warsaw, 12th Commercial Division under KRS item 0000347416, Tax identification number NIP 701-021-82-99 National Business Registry Number REGON: 142242032, share capital PLN 205 860 000, capital paid: PLN 205 860 000. Bank account: Bank Pekao SA, nr: 21 1240 6292 1111 0010 2943 7844. [www.pgeej1.pl](http://www.pgeej1.pl)

- b) types of impacts and elements of the environment that require a detailed analysis,
- c) scope and methods of surveys and investigations.

Under § 2 section 1 pt. 4 of the Council of Ministers Regulation of 9 November 2010 on types of projects likely to have significant effects on the environment (J.o.L. of 2010, no. 213, item 1397 as amended) the Project may potentially have a continuous and significant impact on the environment. The Project is therefore deemed to require the development of the Environmental Impact Assessment Report.

Submitting an application for the decision on Environmental Conditions for projects likely to have significant effects on the environment the Applicant may, under art. 69 par. 1 of the Environmental Protection Law, submit not the Environmental Impact Assessment Report but instead a Project Information Sheet together with an application for the definition of the scope of the Report. Under sub-point 2 of the above the definition of the scope of the Report is obligatory for projects which may have a transboundary impact on the environment.

However, the Environmental Protection Law does not define the concept of "transboundary impact". A definition is included in the Convention on Environmental Impact Assessment in a Transboundary Context drawn up in Espoo on 25 February 1991. Under art. 1 pt. VIII of the Convention, transboundary impact means any impact, not exclusively of a global nature, within an area under the jurisdiction of a Party and caused by a proposed activity the physical origin of which is situated wholly or in part within the area under the jurisdiction of another Party. An NPP has a transboundary environmental impact when adverse effect to the environment may reach outside the territory of Poland. In the light of the Espoo Convention, nuclear power plants are projects for which a transboundary environmental impact assessment is obligatory.

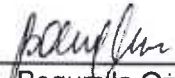

The Applicant submits the Project Information Sheet together with an application for the definition of the scope of the Environmental Impact Assessment Report and not the Environmental Impact Assessment Report.

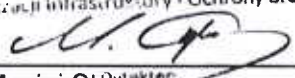

The Decision on Environmental Conditions for the planned Project is necessary so that further decisions may be obtained, including:

- the decision on determination of the site for investment in a nuclear power facility,
- the construction license for the nuclear power plant,
- the construction permit for the nuclear power plant.

In the case where the number of parties to the application procedure for the Decision on Environmental Conditions is higher than 20 then, under art. 74 pt. 1a of the Environmental Protection Law the Environmental Impact Assessment Report is supplemented with a copy of the map specified in par. 1 pt. 3, a copy of the attachment specified in art. 1 pt. 3a and an extract from the registry specified in art. 1 pt. 6.

Considering the scope of the potential impact of the Project, as described in Section 10 of the Project Information Sheet, it needs to be recognized that the number of Parties to the application procedure for the decision in question will be higher than 20.
